

**Berichtigung der
Studiengangsspezifischen Prüfungsordnung
für den Masterstudiengang
Battery Systems Engineering
der Rheinisch-Westfälischen Technischen Hochschule Aachen
vom 11.07.2025
(Prüfungsordnungsversion 2025)**

Die studiengangsspezifische Prüfungsordnung für den Masterstudiengang Battery Systems Engineering der Rheinisch-Westfälischen Technischen Hochschule Aachen (RWTH) vom 07.04.2025 (Prüfungsordnungsversion 2025) (Amtliche Bekanntmachungen der RWTH, Nr. 2025/145) ist wie folgt zu berichtigen:

- 1. Der Studienverlaufsplan ist durch die entsprechende Fassung in Anlage 1 dieser Berichtigung zu ersetzen.**

Der Rektor
der Rheinisch-Westfälischen
Technischen Hochschule Aachen

Aachen, den 11.07.2025

gez. Rüdiger
Univ.-Prof. Dr. rer. nat. Dr. h. c. mult. U. Rüdiger

Anlage 1: Berichtiger Studienverlaufsplan

Modules	CP	Empfohlenes Semester	WS - 1. Semester				SS - 2. Semester				WS - 3. Semester				SS - 4. Semester			
			S	L	E	P	S	L	E	P	S	L	E	P	S	L	E	P
Compulsory Modules	21		11				5				5				0			
Fundamentals of Lithium-Ion-Batteries and Battery Systems	5	1		2	1													
Modern Research Methods	6	1		2	1													
Energy Storage Systems - Future Technologies and Innovations	5	2						2	1									
Fundamentals of Battery Systems Design	5	3										2	1					
Seminar (Compulsory Modules)	5		0				2,5				2,5				0			
Technical, (socio)economic and political analysis of energy storage components and a sector-coupled energy system	5	2						2,5				2,5						
Research Lab Testing (Compulsory Lab)	5		0				3				2				0			
Battery Testing - Design of Experiment, Check-ups, Data Analysis and Model Parameterization	5	2						24 weeks				12 weeks						
Research Internship (Compulsory)	10	2	0				10				0				0			
Internship Battery Pack Design and Battery Management System (HW)	10	2						300 hours										
Internship Chemical and Physical Cell and Material Analysis	10	2						300 hours										
Internship Diagnostics	10	2						300 hours										
Internship Laboratory of Field Installation or Operation of Mobile or Stationary Battery Systems	10	2						300 hours										
Internship Modelling	10	2						300 hours										
Internship Production	10	2						300 hours										
Internship Recycling and Life Cycle Analysis	10	2						300 hours										
Internship Sensors, Measurement Devices and Electronics	10	2						300 hours										
Research Labs (Elective)	20		10				0				10				0			
Chemical and Physical Cell and Material Analysis	10	1		14 weeks								14 weeks						
Production	10	1		14 weeks								14 weeks						
Diagnostics	10	1		14 weeks								14 weeks						
Modelling	10	1		14 weeks								14 weeks						
Sensors, Measurement Devices and Electronics	10	3		14 weeks								14 weeks						
Battery Pack Design and Battery Management Systems (HW)	10	3		14 weeks								14 weeks						
Laboratory of Field Installation or Operation of Mobile or Stationary Battery Systems	10	3		14 weeks								14 weeks						
Recycling and Life Cycle Analysis	10	3		14 weeks								14 weeks						
Elective Modules	25		5				10				10				0			
Advanced Battery Production Technology	5	1		2	1			2	1			2	1					
Physical and Chemical Methods for Post-Mortem Investigations of Batteries	5	1		2	1			2	1			2	1					
Advanced Battery Diagnostics and Mobile Applications	5	2		2	1			2	1			2	1					
Battery Modelling and Machine Learning	5	2		2	1			2	1			2	1					
Understanding Battery Degradation	5	2		2	1			2	1			2	1					
Fundamentals of Design and Performance of Active and Passive Materials for Advanced Batteries	5	3		2	1			2	1			2	1					
Hardware of Battery Pack & Stationary Applications	5	3		2	1			2	1			2	1					
Recycling, Circular Economy and Charging Infrastructure	5	3		2	1			2	1			2	1					
Language Courses	4		4				0				0				0			
Language Course 1	2	1		2	2													
Language Course 2	2	1		2	2													
Master Thesis	30		0				0				0				30			
Master Thesis	30	4													6 months			
Total	120		30				30,5				29,5				30			

*) Three modules must be chosen to match the topic of the Research Labs and the Research Internship.

**) Students have to select a different topic for the Research Internship and each of the two Research Labs. Thus, a total of three different topics must be chosen. The topics of Labs and Internships may not be the same.
